

High Pressure Pump Operator IC

Practical workbook Supervisor

Practical workbook High Pressure Pump Operator IC – version Practical supervisor

Introduction

The participant will practice in the company with skills for the profession of High Pressure Pump Operator IC. The participant practices the skills by carrying out various practical assignments. By performing these assignments several times, the participant learns to perform the work increasingly well.

The practical supervisor (mentor) guides and coaches the participant. That means you:

- Instruct and explain the practical assignments to the participant.
- Listen to and understand the learner.
- Are not immediately ready with a judgment.
- Analyze and see where the participant still has difficulties.
- See mistakes as opportunities to learn.
- Encourage the participant when he does well.
- Specifically point out things that are not going well yet.
- Give feedback to help a participant improve.
- Ask open questions to the participant.
- Are a support and refuge for the participant.

Guidance in carrying out the practical assignments

The participant will work on various practical assignments in the workplace. First, he performs an introductory assignment.

In this assignment, the participant gets an idea of what the profession High Pressure Pump Operator IC entails, the participant collects contact details and the participant makes a step-by-step plan with your help. The nature of the work of the company and the client is examined.

Discuss the detailed assignment with the participant. Is everything clear? Does the participant know which step to take? Is the schedule realistic?

Also discuss at what times the participant can come to you with questions and when you will give him feedback on his work.

There are eleven different practical assignments for the participant High Pressure Pump Operator IC that he must perform at least 3 times. As a supervisor, you provide feedback and suggest points for improvement on the basis of each assignment performed.

You base the feedback on the professional competences and criteria that go with it. With this you can easily substantiate your opinion.

- Limits nuisance as a result of the work to a minimum.
- Ensures a tidy workplace after the work is completed.
- Prevents causes for complaints as much as possible.
- Takes every complaint seriously and ensures follow-up.

Select three competences that the participant still needs to work on and indicate for each competence which behavioral criteria are the most important points for attention for this participant. Give this back to the participant as feedback.

In addition, indicate which competencies the participant already does well. Motivate your choice with some behavioral criteria that the participant already demonstrates very well.

An example:

In the assessment of participant 1 you noticed that he works sloppily and does not know exactly how the aids work.

You select from three competencies that this participant must work with: 1. Works safely, hygienically, cost- and environmentally consciously, 3. Uses the right materials and resources and 6. Works together with others.

The next step: You determine for each competency which behavioral criteria the participant should improve in particular. For competency 1. This is, for example: Keeps the workplace clear and clean and Collects waste and sorts it according to regulations.

You make the following overview of this feedback.

Competence	What requires attention
<i>1. Works safely, hygienically, cost and environmentally conscious</i>	<i>Keeps the workplace tidy and clean</i>
	<i>Collects waste and sorts it according to regulations.</i>
<i>3. Uses the right materials and resources</i>	<i>Handles materials and resources efficiently.</i>
	<i>Knows the uses of materials and resources.</i>
<i>6. Collaborates with others</i>	<i>Asks for help if he can't figure it out on his own</i>

	<i>Shares relevant information with colleagues</i>

Participant 1 also showed his strengths. Also mention that in the feedback.

You select 2 or 3 competences on which this participant scores well. For example: 2. Plans and organizes the work and 5. Communicates with colleagues, supervisors and external parties.

The participant shows the strengths per competency in the following behavioral criteria. At Competency 2. Uses relevant information, such as instructions and work order and Works according to safety procedures, regulations and work instructions.

You can also put this feedback in an overview:

Competence	What are you good at
<i>2. Plans and organizes the work.</i>	<i>Uses relevant information, such as instructions and work order</i>
	<i>Works according to safety procedures, regulations and work instructions</i>
<i>5. Communicates with colleagues, managers and external parties.</i>	<i>Uses correct manners.</i>
	<i>Contributes to a positive working atmosphere.</i>

Give the participant feedback in the overviews and explain it orally. The participant knows that he has to pay extra attention to the points of attention indicated. The participant also knows what he scores particularly well on.

When the participant does the assignment for the second and third time, take this feedback back. Is there improvement? If so, in which parts?

Evaluate the program regularly with the participant's manager.

If the participant is not skilled enough after performing the same practical assignment 3 times, you can decide in consultation with the manager to have the participant perform this assignment a fourth or fifth time.

If you think that the participant is not suitable for the profession, you should also discuss this with the participant's manager.

Completion of practical assignments and planning of the final test

The participant who has shown that he can perform all practical assignments well, may take a final test.

In the final test, the participant carries out a practical assignment.

The company determines where the participant can perform the final test and chooses an assignment that is relevant for a High Pressure Pump Operator IC and in which the participant can show all his skills.

During the final test, the participant carries out the assignment completely independently, without further guidance.

You assess the completed assignment on the basis of the assessment form below.

Core task 1: Preparing cleaning activities			
1.1 Collecting of required material, tools and equipment	I	G	N
Ensures that materials and tools are collected. <ul style="list-style-type: none"> Collects and interprets relevant information Determines the resources and people required to carry out the work Knows the possible uses of materials and resources Sets goals and priorities 			
Checks that the necessary materials are ready for use. <ul style="list-style-type: none"> Indicates to others risks of unsafe situations Checks own PPE Organizes the work of colleagues

Checks the work of employees. <ul style="list-style-type: none"> • Monitors the progress of the work and sets priorities • Holds employees accountable for their responsibility • Takes differences between employees into account when dealing with them 			
Provides feedback on the outcome of checks. <ul style="list-style-type: none"> • Signals tensions and acts accordingly. • Discusses problems and looks for solutions 			
I: Insufficient G: Good N: Not observed			
Total assessment final test: Pass / Fail*			

The participant must score Good for all parts to pass the final test.
A maximum of 3 underlying points of attention may be given the score 'N: Not Observed'.

Discuss the assessed assignment with the participant afterwards. Then you also give the result of the final test to the participant.

If the participant has passed the final test, the High Pressure Pump Operator IC module has been completed.

If the participant has not passed, you discuss which practical assignments the participant can perform again in the workplace to gain even more experience.

*If you assess the final test with two people, the first step is to compare the scores of both assessors and arrive at a common point of view. You discuss this common position with the participant.
